TECHNICAL INFORMATION _ **CAT. N. YACT HNKE 0##0 X0000**

90° EXTENDED HAND KNOB 300mm STRAIGHT VERSION

Clean and Aseptic Valves of CAD Product Line have simple and safe design, with their full drainability, without asymptotic seal and dead leg, are offering fast cleanability and sterilization practices. They are designed to fulfil stringent demands of CIP-SIP and Production Cycles on Aseptic Processing.

HNKE - 90° Extended Hand Knob is designed to control the CAD Clean and Aseptic Valves on SAFE areas for all application where a more comfortable or safe management is required, such as on CAD Bottom Tank Valves. It has few and simple moveable parts which results in a very reliable component and low maintenance cost. Standard extension of 300 mm but special lengths available on request. Rotating system as standard for an easier assembling and ready to be connected to the CAD Double Position Sensor (H060: YACT-SEND-0XX0-X0000).

	max psi(g)	87	87	87				
	min bar(g)	-1	-1	-1				
	min psi(g)	-14	-14	-14				

Environment Temperature: are autoclavable 135°C in sealed bag

Application Areas: SAFE

Note: The applied valve body and diaphragm may have different design temperature and/or pressure limits. The weakest component determines the maximum design temperature and pressure limits, when they are assembled.

Surface Roughness: External surface Ra ≤ 0.8µm (32µinch)

Lubricant: Actuator are lubricated to workshop and don't need lubrication

Labeling: Each Actuator is labeled for full LOT traceability

Packaging: The Actuator is packaged in a closed box with Operating and Maintenance bulletin, Certificate of Conformity and Materials Certification 3.1

Quality Control: Quality Assurance System guarantees the control and traceability of the product.

Options: For non-standard Actuator Options or special length, please contact us for further information.
